

Q5)

```
#include <iostream>
```

```
using namespace std;
```

```
int main()
```

```
{
```

```
    int x, y;
```

```
    cout << "Enter minimum amount of money to pay tax on: ";
```

```
    cin >> y;
```

```
    cout << "Enter money earned: ";
```

```
    cin >> x;
```

```
    cout << "Minimum money to be invested: " << (x-y);
```

```
    return 0;
```

```
}
```
